Special Firing- On Demand <sup>3</sup>	Base Rate + \$25
Custom Mid-range Glaze Fire Schedule	\$195+ fee <sup>4</sup>

### Outside Firing Guidelines:

All works are required to be bone dry, as determined by the studio technician, prior to firing.

1/16-inch minimum shelf clearance is required for all tested glazes.

Untested glazes and glaze combinations require an unglazed drip tray to protect kiln shelves.

### Footnotes

1. Included colorants: ferric chloride, seaweed, bronze wool, steel wool, salt, sugar, feathers, other colorants if available. Additional colorants are available at cost.
2. Luster firing requires the approval of one of the pre-programmed cone fire schedules by the customer. Results are not guaranteed. Manufacturer guidelines are recommended.
3. On-Demand Firing charges are applied if firing is requested and fulfilled when the kiln is loaded to less than 30% kiln capacity (i.e., less than 2 ft<sup>3</sup>).
4. Custom mid-range glaze firing schedules include the base rate of \$195 plus an additional fee equal to the energy rate multiplied by additional energy used in custom firing schedule.
